

Paradigm 700VS Labeler

The 700VS labeler is our entry level labeler offering. However, just because it is our base model does not mean that it is in any way inferior in its ability to put a wrinkle-free, straight label onto a round container. This machine can consistently apply labels to your container with minimal user input. It is also upgradeable to meet future demands.

Machine capabilities:

- Fully automated
 - PLC controlled
- 1" to 6" tall x 14" long labels
 - Upgradeable to 7 1/2" tall labels
- Consistent pressure across the entire label length
- Fully adjustable from 1" to 5" diameter containers
- Clear label application with inclusion of trunnion or rotary turret and clear label sensor

Speeds up to 70 containers per minute.
Upgradeable to speeds ranging from 180-200 cpm with feedscrew for opaque labels and 180 bpm with trunnion for clear labels.

Options

Clear Label Sensor (Requires Trunnion or Rotary Turret)

Rotary Turret (for Clear Labels)

7-1/2" Tall Label Upgrade

Trunnion Upgrade (for Clear Labels at High Speeds)

Feedscrew Infeed (for Opaque Labels at High Speeds)

Single Servo Upgrade (120 cpm)

Dual Servo Upgrade (180-200 cpm)

Extended Conveyor Upgrade
